Tensorflow2 frozen graph does not work

Hi, I was trying to convert a Tensorflow2 model (frozen graph, .pb file) but it failed. What is the recommended workflow for TF2 models since TF2 is becoming the mainstream of Tensorflow now? When Vitis will support TF2 models? Thanks!

Hi [@drama](#),

This is a good question. It is on the road map. But I am afraid that I can't guarantee the release date.

If you have further request I would suggest you to contact Xilinx FAE/Sales team.

Best Regards,
Jason
